**FOR IMMEDIATE RELEASE**

**NAME OF COLLEGE:**

***"We need advanced manufacturing students"***

XXX, WI – June XX, 2014 – NAME OF LOCAL TECHNICAL COLLEGE is seeking displaced workers and veterans looking for new skills to enroll this fall in training programs to help fill a critical need for high-skilled manufacturing workers in Wisconsin.

The outreach effort, which is part of a statewide grant consortium, "Advance Wisconsin – Manufacturing," initiative to help train more than 2,700 workers displaced by imports and veterans returning from active service with high-demand manufacturing skills in computerized numeric control (CNC)/machine tool, welding, and industrial maintenance programs.

"Manufacturing in Wisconsin is growing and there are terrific jobs out there for workers willing to train and retool," SAID LOCAL TECHNICAL COLLEGE SPOKESPERSON, noting the area's manufacturing jobs pay median salaries ranging from INSERT LOCAL MEDIAN WAGES FOR THE CAREER TRAINING SKILLS YOU OFFER (WELDING, CNC/MACHINE TOOL AND/OR INDUSTRIAL MAINTENANCE). "Our technical college is working hard to meet the local need for these highly skilled workers."

"The jobs are out there. Not only is the manufacturing industry growing and needs highly trained workers, but the current workforce is nearing retirement age," HE/SHE SAID. "We need our veterans and hard working, displaced workers to give this opportunity a good hard look. Our state needs highly skilled workers if we're going to prosper."

Wisconsin manufacturing is on the rebound, adding 2,300 jobs in March alone this year and manufacturers statewide say they could grow faster if they had greater numbers of new skilled manufacturing workers.

Manufacturing took an enormous blow in the recession of 2008. But manufacturing exports have doubled since 2000, and manufacturing is now about a fifth of Wisconsin's economy, producing \$21 billion worth of goods in 2011.

QUOTE FROM LOCAL MANUFACTURER SEEKING SKILLED WORKERS. QUOTE FROM RECENT GRADUATE.

"This effort is an excellent example of the public and private sectors working together to fill a highly specialized need in our economy that has great promise for our state's future," COLLEGE SPOKESPERSON said. "WE'RE ENCOURAGING THOSE WHO ARE INTERESTED TO CONTACT THEIR LOCAL TECHNICAL COLLEGE AS SOON AS POSSIBLE FOR PRIORITY ENROLLMENT."

Advance Wisconsin – Manufacturing is a consortium of Wisconsin’s 16 technical colleges who have the goal of improving advanced manufacturing training. The U.S. Department of Labor’s Employment and Training Administration has funded 100% of this project equaling \$14.9 million. This is an equal opportunity program.
